

NECKLACE & WAISTBAND

NECKLACE & WRISTBAND

Silicone bracelets are made of high quality silicone rubber. Even though our standard circumferences are either 7" or 8", with a 1/2" width, we are able to provide any kind of measurements using different techniques individually, or in combination of embossing, debossing, screen printing, mixed colors material, glow in the dark and many more.

2D&3D PVC bracelets models are available on all requested sizes. All PMS colors can be atched, as well as glow in the dark, glittering, and translucent effects. Metal plated and plastic colors are also customizable

Printed nylon wristbands can be screen printed and offer a smooth and shiny option to adorn your wrist.

Snap bracelets are slapped against your forearm, causing the bands to spring back in curve.

Sweatbands are comfortable, durable, washable, and of course super-absorbent. Made of 80% cotton and 20% stretch nylon, they will display your logo directly knitted on the material or embroidered on a patch.

Lanyards are indispensable items for all trade shows, meetings, or all other events. Get the right customized lanyard using a wide range of fabric material available (polyester, nylon, satin, etc). We can offer an extensive set of hooks and attachments to suit all needs. Your logo can be displayed through screen printing, weaving, sublimation, heat transfer, or in PVC.

ID plates are ideal to be customized with your organization or corporate logo and come in a complete line of tags. These items can be made in aluminum, stainless, zamac, brass, iron, leather, EVA, PVC, or silicone materials.
